

Extra Question # 02

Home has special discounts for glassware and furniture products. The discount rates are given below:

Glassware %15,

%10 extra discount, if the price is 100 TL and over

Furniture %30

%15 extra discount, if the furniture's type is leather

Write a C program that will read the price and type of a product (if the product is furniture ask if it is leather), calculates and displays the discounted price. Please examine the example runs. Use switch statement where necessary.

Project Name: EQ2
File Name: EQ2.cpp

Example Run #1:

```
Enter price: 120
Enter product type (G/g or F/f): g
Discounted price is: 90.00 TL
```
